CA Forest Carbon Policy
Overview

A PANEL DISCUSSION:
SHELBY LIVINGTON (CARB)
MATTHEW DIAS (BOF)
RUSSEL HENLY (CNRA)
CA Forest Carbon Policy

Little Hoover Commission: California’s Independent State Oversight Agency

Special Report #242, “Fire on the Mountain: Rethinking Forest Management in the Sierra Nevada February 2018: Recommendations to the Governor covering 9 critical areas

Governor Edmund G. Brown Jr.- 2018 “State of the State” Speech
Discussion Questions:

California’s Little Hoover Commission, the Forest Carbon Plan and AB32 Scoping plan all call for increasing the pace and scale of forest management, prescribed fire and other activities that improve forest resiliency in the face of climate change.

1. What data and metrics are needed to prioritize locations to implement projects?
2. How much area do we need to work and what are the major challenges?
3. What are the risks and rewards to increasing pace and scale of forest treatments?
4. How do we measure progress towards improved outcomes? How do we know if we’ve gone too far?
